ANAY MAURYA

JAVA BACKEND DEVELOPER | SPRING BOOT | REST APIs | POSTGRESQL

Noida, India | +91 7905619358 | anaymaurya04@gmail.com
LinkedIn: linkedin.com/in/anay-maurya | GitHub: github.com/anaymaurya04

SUMMARY

MCA candidate at JIIT Noida focused on Java backend development with Spring Boot, Spring Data JPA/Hibernate, and PostgreSQL. Built a durable request-execution service with explicit timeout-state handling, idempotency, concurrency controls, and 22 automated tests.

TECHNICAL SKILLS

Languages: Java 17/21, SQL
Computer Science: Data Structures & Algorithms, Object-Oriented Programming
Backend: Spring Boot, Spring MVC, Spring Data JPA, Hibernate, REST APIs, Spring AI
Databases & Search: PostgreSQL, pgvector, H2, Apache Lucene
Testing & Tools: JUnit 5, API and integration testing, Maven, Git, GitHub, Postman, Docker Compose

PROJECTS

Relay: Durable Execution & Reliability Layer
github.com/anaymaurya04/Relay
Java 17, Spring Boot, Spring Data JPA, Hibernate, PostgreSQL, JUnit 5, Maven

- Built a service that executes API calls on a client's behalf and records ambiguous timeouts as “unknown” rather than guessing.
- Modelled five request states and four network failure types, distinguishing errors where a request was never sent from cases where it may have been sent.
- Prevented duplicate operations: eight simultaneous identical requests create exactly one operation, enforced by a unique constraint and concurrency tests.
- Used Idempotency-Key headers for outbound calls; workers claim jobs with PostgreSQL row locking using FOR UPDATE SKIP LOCKED.
- Wrote 22 automated tests against a real PostgreSQL database and real HTTP servers, including forced connection resets.

E-Commerce Backend: REST API
github.com/anaymaurya04/ECommerce-Backend
Java 17, Spring Boot, Spring Data JPA, Hibernate, H2, Maven

- Built 15 REST API endpoints for users, products, carts, and orders using Spring Boot, Spring Data JPA, and Hibernate.
- Implemented per-user cart and order separation, keyword product search, and soft deletion; organised the application into controller, service, repository, model, and DTO layers.

IndiLex: Hybrid Search for Indian Supreme Court Judgments
github.com/anaymaurya04/IndiSearch
Java 21, Spring Boot, Spring AI, PostgreSQL, pgvector, Apache Lucene, PDFBox, Docker Compose, JUnit 5

- Built search, ingestion, and health endpoints for a hybrid search service over Supreme Court judgments.
- Implemented PDF extraction and section-aware chunking (Facts, Held, Order), with 384-dimensional embeddings stored in PostgreSQL using pgvector and an HNSW index.
- Combined vector and Apache Lucene BM25 results using Reciprocal Rank Fusion and a citation boost; wrote three JUnit 5 test suites for chunking, rank fusion, and citation boosting.

EXPERIENCE

Freelance Web Developer | Bharat Foundation | Nov 2025 – Feb 2026

- Built and delivered a website for Bharat Foundation as a paid freelance project using HTML, CSS, and JavaScript.

DEF-SPACE Winter Intern | Bharat Space Education Research Centre (BSERC) | Dec 2025 – Jan 2026

- Contributed to grassroots technology development and research-driven problem solving under the Viksit Bharat @2047 initiative.

LEADERSHIP & ACTIVITIES

- Lead Organizer, HackDiwas: mentored three competing teams with technical guidance.
- Developer Team Lead, U Hack 2.0: led a team in shipping a full-stack product in 24 hours.
- Java Mentor & Computer Lab Assistant, Rishi Public School | Nov 2024 – Jan 2025: taught Java fundamentals and supported hands-on computer lab activities.

EDUCATION

Master of Computer Application (MCA) | JIIT Noida | 2025 – 2027
Coursework: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, Software Engineering
Bachelor of Computer Application (BCA) | United University | 2022 – 2025
